

Today's business environment is characterized by both opportunities and challenges. And, there is constant change - accentuated by cut-throat competition, changing market dynamics, and constantly evolving organization structure by way of regulatory changes, diversifications, expansions, mergers and acquisitions. The success in such hyper environment depends on the speed, efficiency, and strength with which businesses can respond and adopt to changes for continued success.

Arkin Software Technologies offers a comprehensive set of Business Intelligence services and solutions to help you optimize business performance by becoming agile, efficient, and adaptable. With range of services starting from formulating a strategy, setting roadmap and full implementation life cycle, Arkin Software Technologies works with you every step of the way transforming your organization for high-performance.

Arkin Software Technologies brings best of technical and industry leading practices to maximize returns on your Business Intelligence solutions by tailoring to the specific needs of your business and your organization, with prioritization based on market dynamics, enterprise inertia, business priorities, investment strategy, and ROI. Our approach combines meeting existing demands of the enterprise, while preparing for the future.

As a single integrated service provider, we offer extensive industry experience and comprehensive knowledge to manage and execute complex end-to-end Business Intelligence solutions on global scale, always on time and within budget. Our solutions have assisted customers across multiple industry verticals from strategy to implementation to post-implementation support. As a standard, we use tools-based implementation approach to deliver high-quality solutions. Further, we strive to transfer our best practices and knowledge to clients' internal teams for higher returns.

- * Solution Implementation
 - @ Data Integration and Data Warehousing
 - @ Ad hoc Query and Enterprise Analytics
 - @ Operational Reporting
 - @ Dashboards
 - @ Score cards and Performance Management
 - @ Deployment and Optimization
- * Outsourcing and Support

CENTER OF EXCELLENCE (CoE)

The Centre of Excellence (CoE) is an expert team of consultants that facilitate, implement, provide leadership and manage large-scale Business Intelligence solution development in various BI technologies. The role of this team is to provide strategic direction, executive leadership and guidance, specialist skills and knowledge, and operational assistance in the implementation and management of a particular discipline or activity, specifically related to reusable frameworks, solution accelerators and methodologies. Designed with a view to reduce the effort required for building enterprise-wide applications, these frameworks also keep the application complexity in check and therefore improve performance, reduce bugs and make the solutions more maintainable. The solution accelerators and frameworks provide customers with high quality solutions at a lower total cost of ownership.

ALLIED SERVICES:

Audit of BI Solutions

Arkin Software Technologies independent assessment of Business Intelligence Solutions' effectiveness in an organization is a very useful service. Our review not only evaluates, but provides solutions for enhanced controls and process efficiency. Our study usually highlights potential BI functionalities usage that is unused for optimal performance and future maintenance.

Remote Administration

Our Remote Administration services allow organizations to free up the scarce resources of the organization, and provide you the Arkin Software Technologies expertise and best practices to realize the full potential of your BI investments. Arkin Software Technologies offers standard and premium managed service plans to meet the level of service required for your organization. Our typical services under this service include install, configure, patches, upgrades, backups, additional reporting/dashboards, system monitoring, user administration and helpdesk.

Other Technical Services

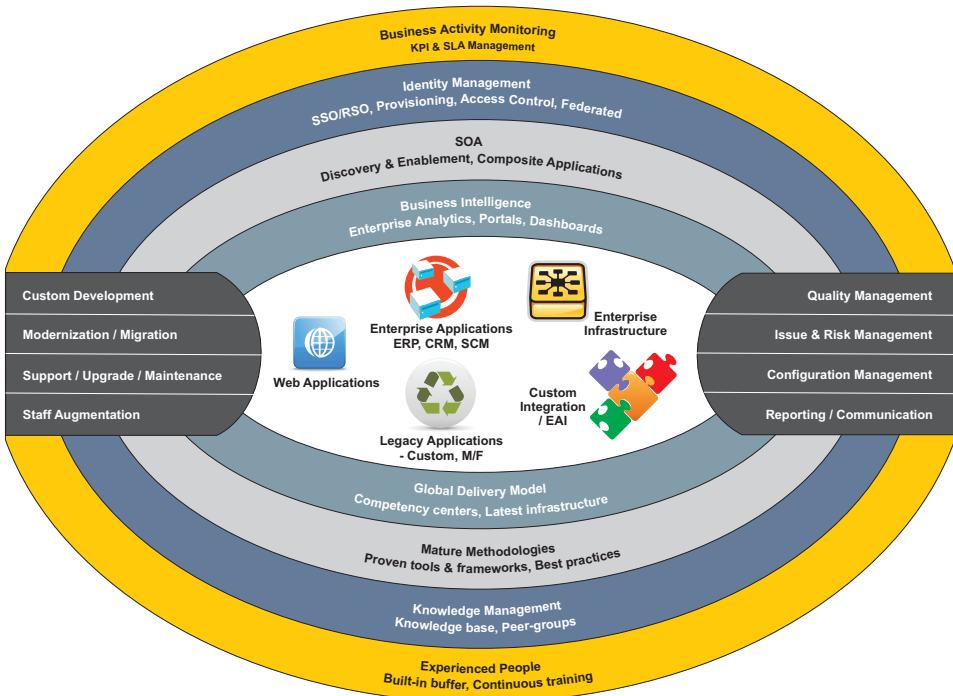

Arkin Software Technologies provides a broad range of additional technical services surrounding enterprise solutions including Content Management, Enterprise Information Portals, enhancements, and performance tuning.
