

Today's technology facilitates instant access to information. But, keeping that information away from those who shouldn't have it is one of technology's greatest challenges. Arkin Software Technologies brings experience in designing and implementing secure, directory-enabled identity management infrastructures for numerous clients. Arkin Software Technologies provides expertise to develop a secure and pragmatic approach to sharing data and transacting electronically with employees, customers, partners and vendors.

Be it a need for secure and controlled access to IT assets to employees or clients; or, tighter collaboration with partners and suppliers; or, statutory compliance considerations; or, business consolidations on account of mergers/acquisitions, or, an organization-wide drive towards secure SOA initiative, Arkin Software Technologies brings best of technical and industry leading practices to variety of identity management scenarios. As a single integrated service provider, we offer extensive industry experience and comprehensive knowledge to manage and execute complex end-to-end Identity and Access Management (IAM) solutions involving diverse technologies, across multiple geographies, always on time and within budget.

With a large pool of certified identity management experts in our Center of Excellence, and aided by robust tools, methodologies, templates, and accelerators, we provide end-to-end identity, access and single-sign-on solutions including implementations, upgrades, application management services, and a broad range of other technical services.

Arkin Software Technologies provides IAM services on packaged IAM tools including Oracle, Sun, IBM, and CA.

OUR SERVICES:

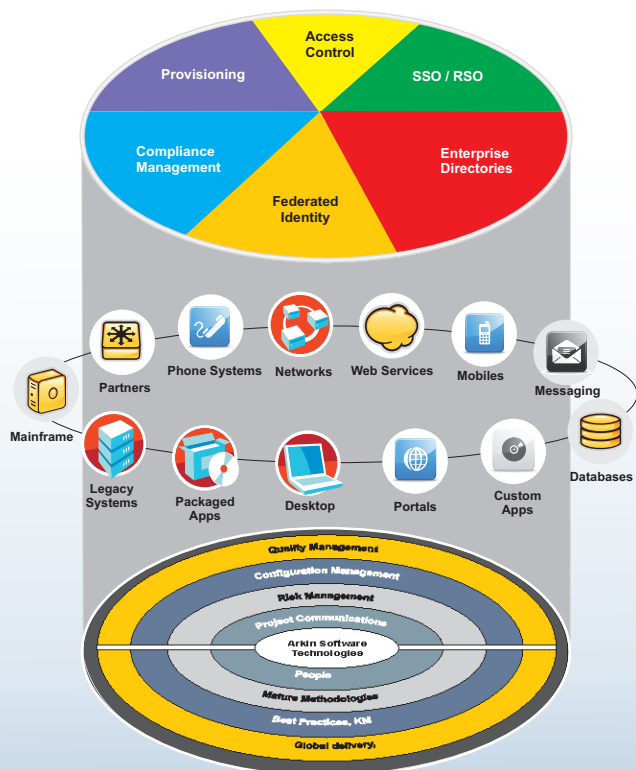

- * **Advisory Services:**
@ Assessments & roadmap, Architecture definition, Technology definition and validation
- * **Implementation Services:**
@ Program management, Access control solutions, Dynamic provisioning, Enterprise directories, Federated Identity, SSO/RSO, Compliance management, Portal solutions
