

Although the need for 'integrated and connected' organization is well understood, the challenges in conceptualizing, architecting and implementing a value-driven integration solution require partner like Arkin Software Technologies.

Be it a need for external partner collaborations; or, increased synergy amongst legacy, packaged and internet-based applications; or, business consolidations on account of mergers/acquisitions, or, an organization-wide drive towards Services Oriented Architecture (SOA), Arkin Software Technologies brings best of technical and industry leading practices to variety of integration scenarios. As a single integrated service provider, we offer extensive industry experience and comprehensive knowledge to manage and execute complex end-to-end integration solutions involving diverse technologies, across multiple geographies, always on time and within budget.

With a large pool of certified integration and SOA experts in our Center of Excellence, and aided by robust tools, methodologies, templates, and accelerators, we provide end-to-end integration solutions including implementations, upgrades, application management services, and a broad range of other technical services. We enable you to attain integration maturity from data level synchronization to application level functional integration to business process integration and optimization.

Arkin Software Technologies provides Integration services on packaged EAI tools including TIBCO, Software AG's Webmethods, Sun SeeBeyond, Oracle, IBM, Microsoft and SAP's Netweaver.
