

A robust J2EE architecture is critical to managing organization's applications and infrastructure. Arkin Software Technologies has been involved with some of the largest business applications for our global customers using Java based technologies.

With a large pool of certified Java experts in our Center of Excellence, and aided by robust frameworks, methodologies, solution accelerators & best practices, we provide end-to-end solutions in designing, developing, integrating and maintaining custom-built Java based applications and websites, enterprise information portals and web content management solutions. We constantly extend our expertise in latest developments in J2EE technologies to help our customers achieve higher productivity.

As a single integrated service provider, we offer extensive industry experience and comprehensive knowledge to manage and execute complex end-to-end application development solutions on global scale, always on time and within budget. Our solutions have assisted customers across multiple industry verticals from strategy to implementation to post-implementation support. As a standard, we use tools-based implementation approach to deliver high-quality solutions. Further, we strive to transfer our best practices and knowledge to clients' internal teams for higher returns.

Arkin Software Technologies provides J2EE services using various application servers (including Oracle, IBM, Sun, JBoss and SAP's Netweaver), frameworks & technologies (including Struts, Hibernate, Spring, log4j, Swing, Jgoodies, XML), and methodologies (RAD, RUP, Scrum, XP).

OUR SERVICES:

- * Advisory Services:
 - @ Enterprise Architecture; Architecture assessment, Technology definition and validation
- * Implementation Services:
 - @ Program management; end-to-end implementation of Applications development; Integration solution; Portal solutions; Enterprise content management; Legacy migration & re-engineering; SOA development; Testing & Validation services;
- * Support & Maintenance Services:
 - @ Production support; Solution upgrades

CENTER OF EXCELLENCE (CoE)

The Centre of Excellence (CoE) is an expert team of consultants that facilitate, implement, provide leadership and manage large-scale application development in J2EE technologies. The role of this team is to provide strategic direction, executive leadership and guidance, specialist skills and knowledge, and operational assistance in the implementation and management of a particular discipline or activity, specifically related to reusable frameworks, solution accelerators and methodologies. Designed with a view to reduce the effort required for building web-based applications, these frameworks also keep the application size in check and therefore improve performance, reduce bugs and make the application more maintainable. The solution accelerators and frameworks - which are based on open standards and best-in-class frameworks - provide customers with high quality solutions at a lower total cost of ownership.

ALLIED SERVICES:

SOA Services

With SOA as approach, we help transform our clients as agile and competitive so as to rapidly create or modify business processes while providing visibility, understanding, and control over processes.

Identity Management

Arkin Software Technologies provides premium consulting services for designing and implementing secure, directory-enabled identity management infrastructures. We provide rich experience to our clients to develop a strategic and pragmatic approach to sharing data and transacting electronically with employees, customers, partners and vendors.

Other Technical Services

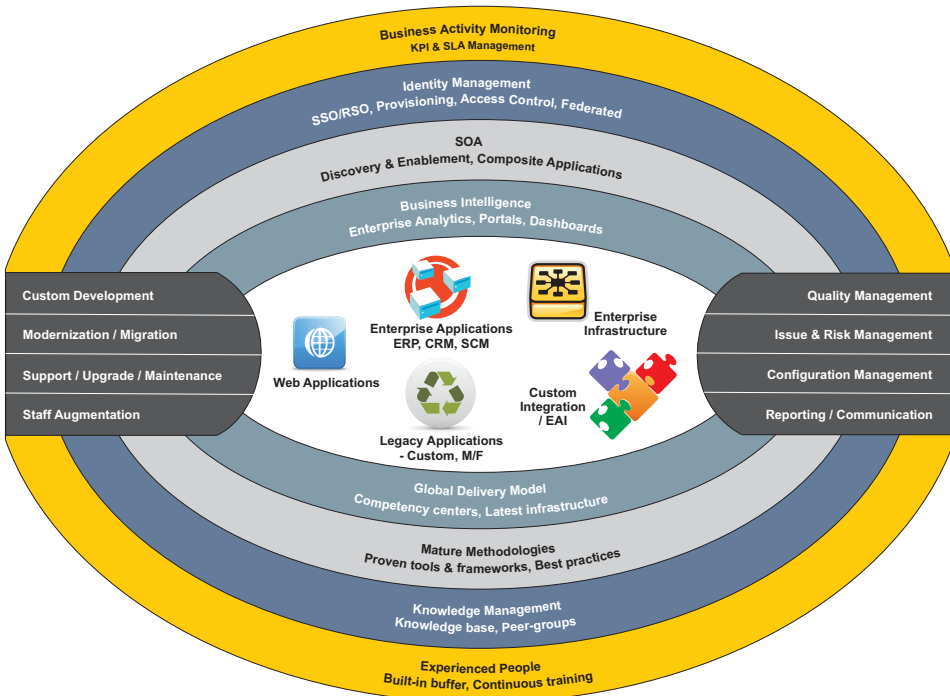

Arkin Software Technologies provides a broad range of additional allied technical services including independent verification & validation services, technical frameworks, release management, enhancements, and performance tuning.

OUR DIFFERENTIATORS:

- " A CMMi Level 3 & ISO 9001:2008 certified
- " Mature custom frameworks, solution accelerators, methodologies and best practices
- " Tools-based development for quick, scalable and easily maintainable applications
- " Experienced cross-functional team with experience across industries and geographies
- " Strategic alliances with several product vendors
- " Ability to provide 24x7 support to clients' applications, systems and network infrastructure in an onsite/offshore model

ABOUT ARKIN SOFTWARE TECHNOLOGIES:

Arkin Software Technologies, formerly known as Goldstone Info Systems a CMMi Level 3 & ISO 9001:2008 certified company, established in the year 2004, is an integrated service provider specializing in large enterprise Information Technology solutions serving global clients with delivery teams in several continents. With business and technology specialists across various domains, supported by mature implementation methodologies and Metrics driven project management, we offer comprehensive solutions to help clients maximize value from their IT investments. Be it a custom development, or supporting your complex IT infrastructure or implementation of new IT initiatives, we have right solution to offer. Our highest quality standards and best practices earned us some of the most demanding global companies as our steady clients.
