

Your business processes are strategic assets and key differentiators of your company. These assets are locked away in expensive proprietary systems and application environments which are difficult to integrate into a modern, Service Oriented Architecture. Arkin Software Technologies provides cost-effective and proven solutions to protect and enhance these assets by freeing them to evolve and reuse, through migration and modernization.

Whether it is a migration, re-engineering or simply a modernization initiative, Arkin Software Technologies brings best of technical and industry leading tools and practices. As a single integrated service provider, we offer extensive industry experience and comprehensive knowledge to manage and execute complex end-to-end migration and modernization solutions involving diverse technologies, across multiple geographies, always on time and within budget.

With a large pool of certified identity management experts in our Center of Excellence, and aided by robust automated tools, methodologies, templates, and accelerators, we provide end-to-end migration and modernization solutions.

You should consider Modernization solutions, if

- " your IT platforms are nearing end-of-life or end-of support
- " finding and retaining qualified engineers on legacy systems is getting difficult
- " the ongoing support of the applications has become expensive, difficult, or slow
- " there is a drive towards new enterprise architecture such as SOA, to unlock embedded business processes

OUR SERVICES:

- * Advisory Services:
 - @ Migration assessments, Inventory & roadmap, Architecture definition, Technology definition, Proof-of-concept (PoC) validation
- * Implementation Services:
 - @ Program management, Architecture migration, Language migration, OS migration, Database migration, User interface migration, Reverse engineering, New development, SOA enablement
- * Support & Maintenance Services:
 - @ Metrics based and SLA governed support programs

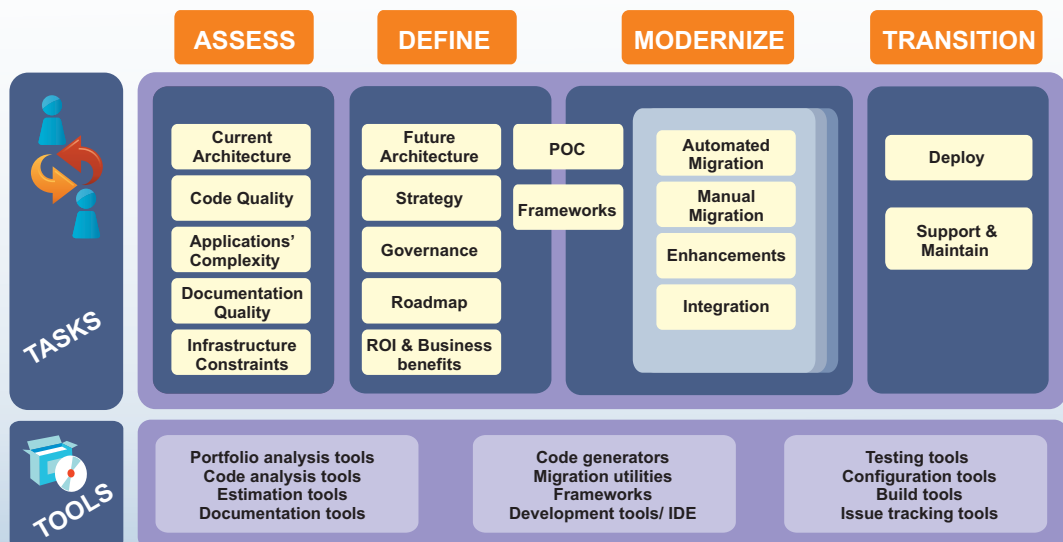

CENTER OF EXCELLENCE (CoE)

The Centre of Excellence (CoE) is an expert team of consultants that facilitate, implement, provide leadership and manage large-scale migrations. The role of this team is to provide strategic direction, executive leadership and guidance, specialist skills and knowledge, and operational assistance in the implementation and management of a particular discipline or activity. The core components of an Arkin Software Technologies CoE include Assessment Services, Tools/frameworks, Best Practices, Release Management, Education & Training, Maturity Model, Skilled Resources, and Support.

OUR DIFFERENTIATORS:

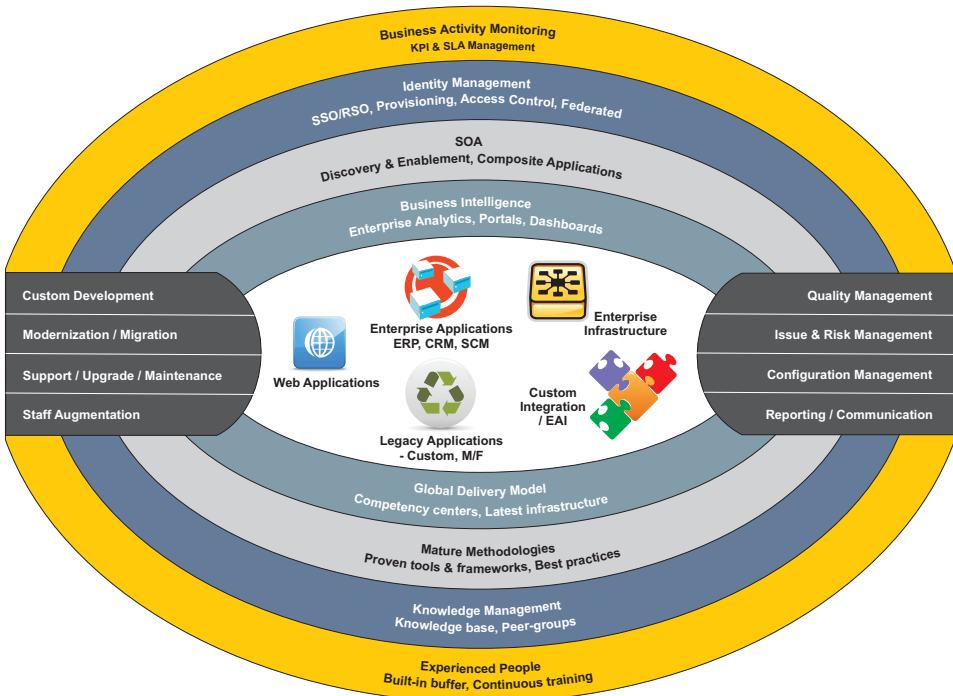

- " Mature automated tools, frameworks, methodologies and best practices
- " Architecture driven methodology - no rigid one-to-one approach
- " Experienced cross-functional team with experience across industries and geographies
- " Drastic reduction in costs related to migration and ownership
- " Ability to provide 24x7 support to clients' applications, systems and network infrastructure in an onsite/offshore model
- " Performance bench marking to ensure migrated applications perform better than the old applications

A CMMi Level 3 & ISO 9001:2008 certified.
