Be it a custom development, or supporting your complex IT infrastructure or implementation of new IT initiatives, we have right solution to offer. We provide excellent blend of technical excellence, coupled with mature implementation methodologies and Metrics driven project management.

**WHAT MAKES US WOW:**

- “ Mature provider of niche solutions with innovative tools and methodologies
- “ Worldwide references for successful engagements
- “ Established and mature methodologies for building comprehensive solutions
- “ Accelerated & flexible delivery models for Best Value
- “ Reliable infrastructure & processes certified with ISO 9001:2008 and CMMi Level 3
- “ Geographic spread of delivery centers
- “ Continuous investments in people, processes and methodologies, to consistently deliver above-industry -standard value

**NOT JUST EXPERIENCE ....KNOWLEDGE MANAGEMENT**

Arkin Software Technologies believes in capturing the knowledge from ongoing engagements for future reuse and reference. Through continuous knowledge acquisition, retention and augmentation, we ensure that on an ongoing basis best practices are institutionalized and leveraged to deliver value to the customer. Further, we consolidate knowledge of technologies, industries and processes into tools that enhance our ability to delivery great solutions faster and cheaper. We have been investing heavily in creating a Knowledge Management infrastructure, with the belief that efficient knowledge exploitation leads to faster response times; builds a competent organization; identifies areas for expansion; and leads to greater customer satisfaction.

## COMPETENCY CENTERS...PAR EXCELLENCE

Arkin Software Technologies invested in multiple competency centers, each of which is focused to identify and refine tools and methodologies for specific solutions. The competency centers collaborate with various ongoing projects, as well as technology leaders such as ORACLE and SUN.

## QUALITY - ARKIN WAY

Arkin Software Technologies approach to solution delivery is metrics-based and process-driven, with clearly measurable and exacting quality standards. Our processes are certified with international standards such as ISO 9001:2008 and CMMi Level 3.

## DELIVERY MODEL ... PROMISE OF HIGHEST 'VALUE'

Being a global IT solution provider with multiple delivery centers, Arkin Software Technologies has the ability to provide services in multiple ways onsite or global-delivery model. In particular, Arkin Software Technologies global-delivery model is a flexible and rapid solution development model that comprises of parallel teams operating from onsite and offshore. Our global-delivery model delivers services and solutions anywhere, with consistently superior quality. At the center of this model are our people, who are ably assisted by collaborative tools, resulting in processes that are consistent and effective everywhere.

Our mature and perfected delivery model combines the benefits of local engagement (high-level solution definition, design) with highly skilled and low-cost consultants at offshore (build, test and support). Typically, our onsite team - comprising of domain experts and system designers is located within the client teams; and offshore team comprising of domain SMEs, application architects, senior engineers, QA and test engineers, and infrastructure management team work under the guidance of a dedicated Project Manager and other Technical Leads. The delivery methodology heavily draws upon standard and well-defined change, issue, and configuration management processes; state-of-the-art communication tools; and web-based tracking tools. The global-delivery model also lends itself to post-production support and maintenance engagements.
