

Services Oriented Architecture (SOA) is an architectural style that helps achieve tighter Business-IT alignment to create new business processes or modify existing business processes. Such agility paves way for Business Process Management (BPM) to provide visibility, understanding, and control over processes that reside anywhere in an extended enterprise, across any combination of people, systems, and corporate boundaries. Combination of SOA and BPM defines your organizations agility and competitiveness. Arkin Software Technologies is your trusted partner as you attempt to transform your enterprise as agile and competitive.

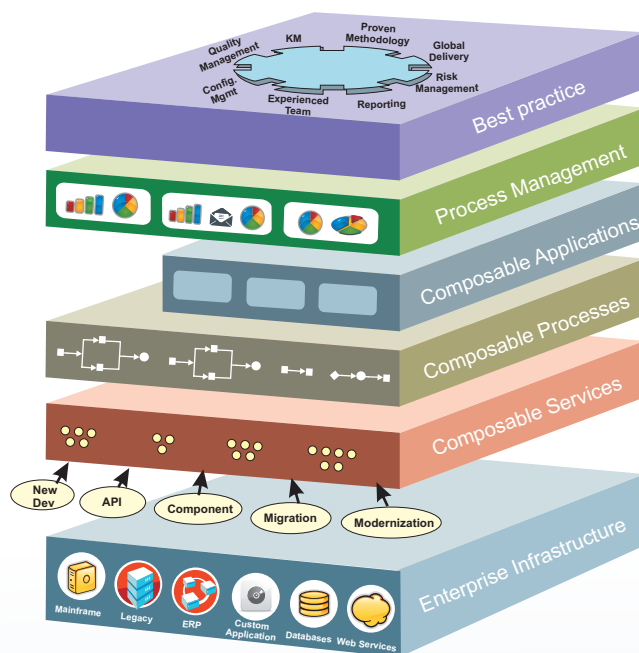

Arkin Software Technologies a CMMi Level 3 & ISO 9001:2008 certified company helps enterprise components to expose functionality as a service, which eases business process deployment across the enterprise. Composite processes can be assembled from individual service oriented components. Arkin Software Technologies follows a mature implementation methodology and offers a variety of services to assist clients at every step of the implementation path Strategy, Assessment & Roadmap, Governance, Services Discovery & Enablement, Process Orchestration, establishing SOA Center of Competence, technical & management implementation of the project, and even post-implementation support.

With a large pool of certified integration and SOA experts in our Center of Excellence, and aided by robust tools, methodologies, templates, and accelerators, we work with you to define your business space, orchestrate your business processes and architect and deliver an industry best solution. We enable you to attain higher SOA maturity with methodical and measurable implementation approach.

Arkin Software Technologies works with best-of-the-breed vendors including Oracle, IBM, Sun, Open source, and SAP's Netweaver.

OUR SERVICES:

- * Advisory Services:
 - @ Strategy, assessment & roadmap, Architecture definition, Technology definition and validation

ALLIED SERVICES:

Audit of Integration Solutions

Arkin Software Technologies' independent assessment of Integration Solutions effectiveness in an organization is a very useful service. Our review not only evaluates, but provides solutions for enhanced controls and process efficiency. Our study usually highlights potential current and projected bottlenecks to aim for optimal performance and future maintenance.

Identity Management

Arkin Software Technologies provides premium consulting services for designing and implementing secure, directory-enabled identity management infrastructures. We provide rich experience to our clients to develop a strategic and pragmatic approach to sharing data and transacting electronically with employees, customers, partners and vendors.

Other Technical Services

Arkin Software Technologies provides a broad range of additional allied technical services including technical frameworks, release management, migration & re-engineering, and performance tuning.

CENTER OF EXCELLENCE (CoE)

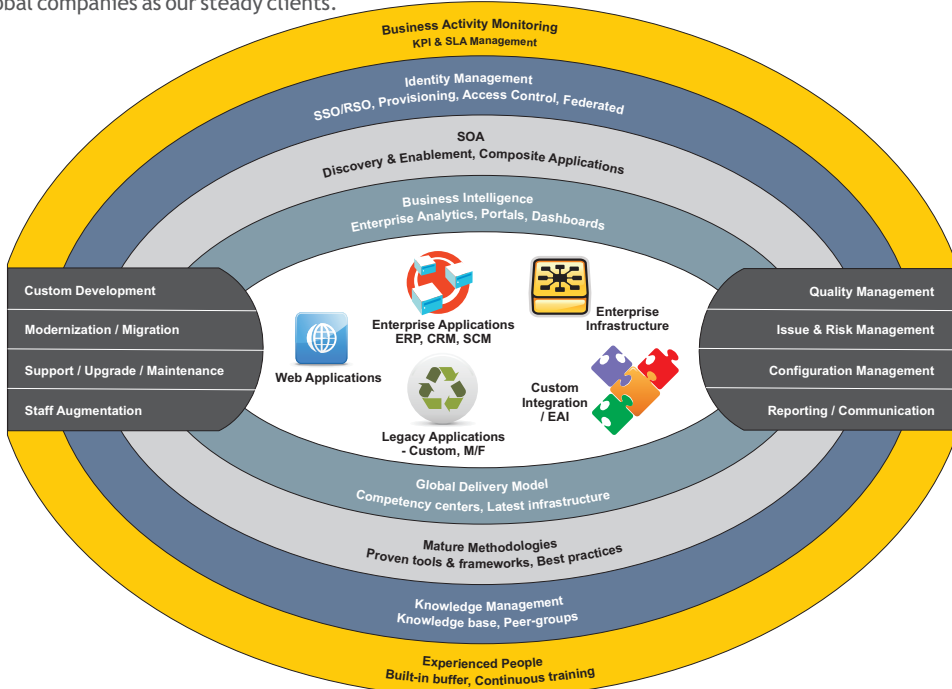

The Center of Excellence (CoE) is an expert team of consultants that facilitate, implement, provide leadership and manage enterprise integration. The role of this team is to provide strategic direction, executive leadership and guidance, specialist skills and knowledge, and operational assistance in the implementation and management of a particular discipline or activity. The core components of an Arkin Software Technologies CoE include - Audit Services, Governance, SOA and BPM Best Practices, Release Management, Education & Training, Common Information Model, SOA Maturity Model, Skilled Resources, and Support.
